Alpha & Omega Semiconductor designs, develops and manufactures leading-edge discrete and analog power management IC solutions. We offer a comprehensive portfolio of Power MOSFET, Power IC, and Transient Voltage Suppressor (TVS) products that meet the complex power requirements of today's advanced electronic systems and consumer electronics.

GSI is a leading supplier of very fast SRAM's, no Bus Turnaround and Synchronous Burst SRAMs. For higher speed applications, GSI has a full suite of SigmaRAM, SigmaQuad-II/II+ and Sigma DDR-II/II+ SRAMs. GSI also offers the largest selection of 3.3V asynchronous SRAMs available, most of which are the fastest and lowest power devices of their type in the world. Lastly, Extended and Military temperature versions available.

Micron is a leading provider of SDRAM, DDR, DDR2 & DDR3, RDRAM®, Mobile LPDRAM, PSRAM & CellularRAM® products. Micron's MLC and SLC NAND Flash product offering includes e-MMC, High Speed, Serial, Enterprise and Block Abstracted managed NAND as well as a full range of NOR flash products. Micron also provides a vast array of MCP & PoP solutions, RealSSD®, Embedded USB and microSD cards as well as Microdisplay Modules & Panels.

Samsung is a world leader in cutting edge Mobile and Digital Media SOC processors, 4 to 32 bit Microprocessors, ASIC, Foundry, Display Driver ICs and CMOS Image Sensors. Samsung delivers a total solution for both Foundry customers and fabless ASIC designers that include an unequalled IP portfolio, high volume silicon manufacturing, advanced packaging and testing capabilities, proven design methodology, and ASIC design integration services.

NXP Semiconductors N.V. (Nasdaq: NXPI) provides High Performance Mixed Signal and Standard Product solutions that leverage its leading RF, Analog, Power Management, Interface, Security and Digital Processing expertise. These innovations are used in a wide range of automotive, identification, wireless infrastructure, lighting, industrial, mobile, consumer and computing

applications.

Seiko is based on more than seven decades of dependable precision timepiece design, development and manufacturing. Seiko offers a broad line of Voltage Regulators, Voltage Detectors, Switching Regulators, EEPROMs, Battery Protection ICs, Crystals, Temperature Sensors, Hall Sensor, Real Time Clocks, Mini Logic, Op Amps and Comparators

SMSC provides Mixed-Signal IC Solutions that enable connectivity and networking in consumer electronics, PC and Industrial Applications. These include: USB Hubs, Card Readers, Transceivers; Ethernet Controllers, Switches & Transceivers; Thermal Management; Capacitive Sensors & PC Embedded controllers
